Install & Configure Your Cloud

Welcome! The following topics explain how to install & configure your cloud with HP Cloud OS for Moonshot.

It's important to read the topics and perform the described steps in order. While some steps are optional, the sequence that you'll follow in the Operational Dashboard is significant, to ensure a proper deployment of your cloud.

Install and set up the Admin node:

- Installation Overview
- Important Tasks Before You Install
- Install and Set Up the Admin Node
- Set Admin Node Prerequisites
- View Connection Settings
- Customize Networks
- Complete Admin Node Installation

After you install and set up the Admin node, you can perform additional steps:

- Manage Nodes and Create a Cloud
- Create Compute Regions
- Enter or Update your License Key
- Customize User Settings
- View Updates and Extensions
- Launch Administration Dashboard for Post-Deployment Tasks

Note: Also see the Operational Dashboard and Administration Dashboard Help topics:

- HP Cloud OS for Moonshot Operational Dashboard Help
- HP Cloud OS for Moonshot Administration Dashboard Help
